

# MT26 FLAIL SHREDDER

This rugged machine can be fitted to any tractors front or rear cat II linkage, independently of the direction of the PTO.

This machine is specifically designed for clearing small trees, bush and heavy grass in amenity areas and on the verges of highways. It is also suitable for trimming grass and lighter growth as the blades can be easily changed to suit the task.

As with all products in the MAJOR range this machine is built to stringent CE standards, which encompass numerous safety features including safety flaps & PTO guarding.

Offset by hydraulic control this machine can be easily manoeuvred around obstructions.

MT26-280
